

# Designing & Leading Productive Teams 2 Day Workshop

Productive teams are at the heart of successful organisations. However traditional approaches to hierarchy and teams are giving way to a more decentralised 'network of teams' approach.

In the new team environment, do you know how to:

- ◆ form a highly functioning team?
- ◆ foster productive team dynamics?
- ◆ correct dysfunctional dynamics?
- ◆ deal with difficult "non-team players" in a team environment?
- ◆ conduct specific conversations that foster a culture of team excellence?

This two-day seminar will provide participants with everything they need to know about developing, optimizing and maintaining high performance teams.

## THE FACILITATOR

Dr. Paul Gibney is a well-known psychotherapist, author and consultant. He has consulted to a multitude of agencies, both in the public and private sectors for three decades. His unique approach combines systemic thinking and strategic interventions to address complex difficulties.

Paul is a talented and entertaining presenter who has a gift for making valuable theoretical insights accessible and combining them with practical patterns of creative interventions.

# Designing & Leading Productive Teams 2 Day Workshop

## THE OPPORTUNITY

**Two day workshop on Designing & Leading Productive Teams Workshop: An Integrated Model for Organisational Excellence.**

At the end of the workshop, participants will be able to:

- ◆ equip themselves to effectively lead a team
- ◆ form a new team, join an established team, lead an established team and create productive team cultures
- ◆ identify and assess team dysfunction and to engage in processes to effectively address that situation and to move the team into productivity and creativity
- ◆ practice so as to enhance, refine and regularly renew their own skill set as a team member and a team leader.
